Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
CB3C1C	LSB-UEA11: Control crawler Interruption bus connection(s)Actuation / release, zero force Output of error, crane function is not selected. Reset master switch (zero force). Error always occurs in con. with a shut off or system error	A50		E	1
CB3C25	LSB-UEA11: Control crawler Modification of counter value crawler track carrier left with brake ap Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C26	LSB-UEA11: Control crawler Modification of counter value crawler track carrier right with brake a Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C29	LSB-UEA11: Control crawler Contact Monitor Pump on winch / crawler erroneous Winch or crawler not selectable Check relay for switch over winch/crawler	A50		E	1
CB3C52	LSB-UEA11: Control crawler Shut off travel gear due to initial diagnostics Error is shown as system error	A50		E	1
CB3C54	LSB-UEA11: Control crawler Report (diagnostics line) travel gear brake has interruption Error is shown as system error check wiring	A50		E	1
CB3C55	LSB-UEA11: Control crawler Current circuit valve travel gear brake has short circuit after ground Error is shown as system error check wiring	A50		E	1
CB3C56	LSB-UEA11: Control crawler Current circuit valve travel gear brake has short circuit after plus Error is shown as system error check wiring	A50		E	1
CB3C60	LSB-UEA11: Control crawler Position control parallel operation, movement differential too great Active act. of emerg. valve only at master switch deflection. Error message Check signal line for interruption, check wiring, switch on valve. Replace valve	A50		E	1
CB3C61	LSB-UEA11: Control crawler Path reg. Parallel operation, no/invalid saved zero point Active act. of emerg. valve only at master switch deflection. Error message Check signal line for interruption, check wiring, switch on valve. Replace valve	A50		E	1

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
CB3C80	LSB-UEA11: Control crawler Modification of counter value, speed < set value, check crawler left Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C81	LSB-UEA11: Control crawler Modification of counter value, speed > set value, check crawler left Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C82	LSB-UEA11: Control crawler Modification of counter value, speed < set value, check crawler right Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C83	LSB-UEA11: Control crawler Modification of counter value, speed > set value, check crawler right Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C84	LSB-UEA11: Control crawler No travel movement detected with controlled crawler left Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3C85	LSB-UEA11: Control crawler No travel movement detected with controlled crawler right Error is shown as system error Check incremental sensor, possibly check hydraulic and travel brake	A50		E	1
CB3CA5	LSB-UEA11: Control crawler Signals slewing platform position to front / to rear implausibel Direction change not possible, last command remains valid Check switch for steering changeover +-90°, check wiring	A50		E	1
CB5C28	LSB-UEA11: Operation crawler Drive crawler not possible - crawler not turned on Output of error, crane function is not selected. On TE3 switch to crawler	A50		B	
CB5C3F	LSB-UEA11: Operation crawler In parallel op., selection only possible with one master switch no reaction Bring all master switches to zero pos., then deflect desired movement again	A50		B	
CB6108	LSB-UEA11: Operation crane control Caution adjustment program is active Program run acc. to selected set-up program End the set-up program properly via the stop button	A50		E	

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
CB611C	LSB-UEA11: Operation crane control Mandatory zero after interruption bus conn.(s) actuation / release No act. of winch. NO act. of winch brake Reset master switch (zero force). Error always occurs in con. with a shut off or system error	A50		B	
CB6134	LSB-UEA11: Operation crane control Output error, aux. brake sys. / aux. user Mot.1 not available Issue of error deleting the available brake power of pump Check line for error. After fixing the error, restart system	A50		E	
CB6135	LSB-UEA11: Operation crane control Output error, aux. brake sys. / aux. user Mot.2 not available Issue of error deleting the available brake power of pump Check line for error. After fixing the error, restart system	A50		E	
CB613F	LSB-UEA11: Operation crane control Selection of several aux. users error report Remove all selections aux. user	A50		B	
CB62A6	LSB-UEA11: operation instruments crane operators cab Function blocked: Brake pumps are active Function is blocked Stop lower winch then power for aux. users is free	A50		B	
CB7007	LSB-UEA11: remote control Zero position compulsion on radio MS No movements possible via radio control Bring radio control master switch to neutral position	A50		E	1
CB7019	LSB-UEA11: remote control No radio release (electrical signal not available) No movements possible via radio control Check electr.line	A50		E	1
CB7090	LSB-UEA11: remote control Short circuit after supply voltage on radio input UEA No movements possible via radio control Check electr.line	A50		E	1
CB9900	LSB-UEA11: Control data transfer CAN internal error at Register-check Controller CAN-transfer is not started replace control device	A50		E	2
CB9901	LSB-UEA11: Control data transfer CAN internal error at RAM-check Controller CAN-transfer is not started replace control device	A50		E	2

F11E51	LSB-BTB1: LSBA Participant Adr. 30 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software	A31.X4:12	O-296.B2	E	2
F11E53	LSB-BTB1: LSBA Participant Adr. 30 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor	A31.X4:12	O-296.B2	E	1
F11E54	LSB-BTB1: LSBA Participant Adr. 30 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value	A31.X4:12	O-296.B2	E	2
F11E64	LSB-BTB1: LSBA Participant Adr. 30 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor	A31.X4:12	O-296.B2	E	1
F11E65	LSB-BTB1: LSBA Participant Adr. 30 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately	A31.X4:12	O-296.B2	E	2
F11E66	LSB-BTB1: LSBA Participant Adr. 30 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part	A31.X4:12	O-296.B2	E	2
F11E67	LSB-BTB1: LSBA Participant Adr. 30 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download	A31.X4:12	O-296.B2	E	1

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
F11E68	LSB-BTB1: LSBA Participant Adr. 30 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus	A31.X4:12	O-296.B2	E	1
F11E69	LSB-BTB1: LSBA Participant Adr. 30 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system	A31.X4:12	O-296.B2	E	1
F11E6A	LSB-BTB1: LSBA Participant Adr. 30 Expanded safety info (time stamp or CRC8) is erroneous Entry in error stack otherwise no reaction. Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode	A31.X4:12	O-296.B2	E	2
F11E6B	LSB-BTB1: LSBA Participant Adr. 30 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode	A31.X4:12	O-296.B2	E	2
F11E6C	LSB-BTB1: LSBA Participant Adr. 30 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor	A31.X4:12	O-296.B2	E	2
F12052	LSB-BTB1: Control data transfer LSBA has recognised Bus collisions, communication interrupted Entry in error memory, driver moves back from bus. Reset triggered if necessary and network reinitialized with temporary malfunctions error will be eliminated from system itself, otherwise check address assignment of sensor	A31.X4:12	O-296.B2	E	0
F12055	LSB-BTB1: Control data transfer LSBA Bus connection faulty/defect, short circuit to supply voltage Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board	A31.X4:12	O-296.B2	E	2
F12056	LSB-BTB1: Control data transfer LSBA Bus connection faulty/defect, no supply/short circuit to earth Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board	A31.X4:12	O-296.B2	E	2
F12057	LSB-BTB1: Control data transfer LSBA has recognised network re-set (data transfer starts again) Entry in error stack, driver restarts and carried out new initialization of network Check bus line, pull successive sensors from bus until source of problem is found. Replace defective part	A31.X4:12	O-296.B2	E	1
F12058	LSB-BTB1: Control data transfer LSBA recognised participant with incorrect baud rate in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by system. Check address assignment of sensors	A31.X4:12	O-296.B2	E	0

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
F12059	LSB-BTB1: Control data transfer LSBA recognised communication breakdown in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by driver when restarting the network	A31.X4:12	O-296.B2	E	0
F1205B	LSB-BTB1: Control data transfer LSBA Short circuit on 2nd LSB-Transistor Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction Driver incorrectly configured. Check parameterization. Otherwise hardware defect. Replace module	A31.X4:12	O-296.B2	E	2
F12060	LSB-BTB1: Control data transfer LSBA driver error: no order to carry out entry in error memory, driver runs on normally and waits for bus connection of participant period problems, error will be fixed by system. If incorrectly configured, new software required	A31.X4:12	O-296.B2	E	2
F12061	LSB-BTB1: Control data transfer LSBA driver error: undefined message appears Entry in error stack, driver restarts and carried out new initialization of network For period problems, error will be fixed by system otherwise new software required to fix error	A31.X4:12	O-296.B2	E	2
F12062	LSB-BTB1: Control data transfer LSBA Driver error: Initialization error Entry in error stack, driver restarts and carried out new initialization of network New Software necessary to remedy error	A31.X4:12	O-296.B2	E	2
F13050	LSB-BTB1: LSBB Participant Adr. 0 reports an incorrect sensor type Entry in error stack, otherwise no reaction. The answer is interpreted acc. to nominal type recognition check address assignment over test system (LSB-screen), install correct sensor	A31.X4:9	O-296.B3	E	2
F13051	LSB-BTB1: LSBB Participant Adr. 0 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software	A31.X4:9	O-296.B3	E	2
F13053	LSB-BTB1: LSBB Participant Adr. 0 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor	A31.X4:9	O-296.B3	E	1
F13054	LSB-BTB1: LSBB Participant Adr. 0 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value	A31.X4:9	O-296.B3	E	2
F13064	LSB-BTB1: LSBB Participant Adr. 0 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor	A31.X4:9	O-296.B3	E	1

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
F13065	LSB-BTB1: LSBB Participant Adr. 0 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately	A31.X4:9	O-296.B3	E	2
F13066	LSB-BTB1: LSBB Participant Adr. 0 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part	A31.X4:9	O-296.B3	E	2
F13067	LSB-BTB1: LSBB Participant Adr. 0 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download	A31.X4:9	O-296.B3	E	1
F13068	LSB-BTB1: LSBB Participant Adr. 0 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus	A31.X4:9	O-296.B3	E	1
F13069	LSB-BTB1: LSBB Participant Adr. 0 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system	A31.X4:9	O-296.B3	E	1
F1306A	LSB-BTB1: LSBB Participant Adr. 0 Expanded safety info (time stamp or CRC8) is erroneous Entry in error stack otherwise no reaction. Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode	A31.X4:9	O-296.B3	E	2
F1306B	LSB-BTB1: LSBB Participant Adr. 0 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode	A31.X4:9	O-296.B3	E	2
F1306C	LSB-BTB1: LSBB Participant Adr. 0 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor	A31.X4:9	O-296.B3	E	2
F13150	LSB-BTB1: LSBB Participant Adr. 1 reports an incorrect sensor type Entry in error stack, otherwise no reaction. The answer is interpreted acc. to nominal type recognition check address assignment over test system (LSB-screen), install correct sensor	A31.X4:9	O-296.B3	E	2
F13151	LSB-BTB1: LSBB Participant Adr. 1 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software	A31.X4:9	O-296.B3	E	2

Fehler-Nr.	Fehlertext / Reaktion / Behebung	Stecker	Blatt	K	W
F13153	LSB-BTB1: LSBB Participant Adr. 1 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor	A31.X4:9	O-296.B3	E	1
F13154	LSB-BTB1: LSBB Participant Adr. 1 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value	A31.X4:9	O-296.B3	E	2
F13164	LSB-BTB1: LSBB Participant Adr. 1 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor	A31.X4:9	O-296.B3	E	1
F13165	LSB-BTB1: LSBB Participant Adr. 1 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately	A31.X4:9	O-296.B3	E	2
F13166	LSB-BTB1: LSBB Participant Adr. 1 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part	A31.X4:9	O-296.B3	E	2
F13167	LSB-BTB1: LSBB Participant Adr. 1 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download	A31.X4:9	O-296.B3	E	1
F13168	LSB-BTB1: LSBB Participant Adr. 1 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus	A31.X4:9	O-296.B3	E	1
F13169	LSB-BTB1: LSBB Participant Adr. 1 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system	A31.X4:9	O-296.B3	E	1
