Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode | A31.X4:12 | O-288.B2 | E | 2 |
| F11A6B | LSB-BTB1: LSBA Participant Adr. 26 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode | A31.X4:12 | O-288.B2 | E | 2 |
| F11A6C | LSB-BTB1: LSBA Participant Adr. 26 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor | A31.X4:12 | O-288.B2 | E | 2 |
| F11B68 | LSB-BTB1: LSBA Participant Adr. 27 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:12 | O-288.B2 | E | 1 |
| F11C50 | LSB-BTB1: LSBA Participant Adr. 28 reports an incorrect sensor type Entry in error stack, otherwise no reaction. The answer is interpreted acc. to nominal type recognition check address assignment over test system (LSB-screen), install correct sensor | A31.X4:12 | O-288.B2 | E | 2 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|--|-----------|----------|---|---|
| F11C51 | LSB-BTB1: LSBA Participant Adr. 28 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software | A31.X4:12 | O-288.B2 | E | 2 |
| F11C53 | LSB-BTB1: LSBA Participant Adr. 28 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor | A31.X4:12 | O-288.B2 | E | 1 |
| F11C54 | LSB-BTB1: LSBA Participant Adr. 28 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value | A31.X4:12 | O-288.B2 | E | 2 |
| F11C64 | LSB-BTB1: LSBA Participant Adr. 28 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor | A31.X4:12 | O-288.B2 | E | 1 |
| F11C65 | LSB-BTB1: LSBA Participant Adr. 28 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately | A31.X4:12 | O-288.B2 | E | 2 |
| F11C66 | LSB-BTB1: LSBA Participant Adr. 28 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part | A31.X4:12 | O-288.B2 | E | 2 |
| F11C67 | LSB-BTB1: LSBA Participant Adr. 28 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download | A31.X4:12 | O-288.B2 | E | 1 |
| F11C68 | LSB-BTB1: LSBA Participant Adr. 28 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:12 | O-288.B2 | E | 1 |
| F11C69 | LSB-BTB1: LSBA Participant Adr. 28 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system | A31.X4:12 | O-288.B2 | E | 1 |
| F11C6A | LSB-BTB1: LSBA Participant Adr. 28 Expanded safety info (time stamp or CRC8) is erroneous Entry in error stack otherwise no reaction. Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode | A31.X4:12 | O-288.B2 | E | 2 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|---|-----------|----------|---|---|
| F11C6B | LSB-BTB1: LSBA Participant Adr. 28 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode | A31.X4:12 | O-288.B2 | E | 2 |
| F11C6C | LSB-BTB1: LSBA Participant Adr. 28 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor | A31.X4:12 | O-288.B2 | E | 2 |
| F11D68 | LSB-BTB1: LSBA Participant Adr. 29 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:12 | O-288.B2 | E | 1 |
| F11E68 | LSB-BTB1: LSBA Participant Adr. 30 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:12 | O-288.B2 | E | 1 |
| F12052 | LSB-BTB1: Control data transfer LSBA has recognised Bus collisions, communication interrupted Entry in error memory, driver moves back from bus. Reset triggered if necessary and network reinitialized with temporary malfunctions error will be eliminated from system itself, otherwise check address assignment of sensor | A31.X4:12 | O-288.B2 | E | 0 |
| F12055 | LSB-BTB1: Control data transfer LSBA Bus connection faulty/defect, short circuit to supply voltage Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board | A31.X4:12 | O-288.B2 | E | 2 |
| F12056 | LSB-BTB1: Control data transfer LSBA Bus connection faulty/defect, no supply/short circuit to earth Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board | A31.X4:12 | O-288.B2 | E | 2 |
| F12057 | LSB-BTB1: Control data transfer LSBA has recognised network re-set (data transfer starts again) Entry in error stack, driver restarts and carried out new initialization of network Check bus line, pull successive sensors from bus until source of problem is found. Replace defective part | A31.X4:12 | O-288.B2 | E | 1 |
| F12058 | LSB-BTB1: Control data transfer LSBA recognised participant with incorrect baud rate in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by system. Check address assignment of sensors | A31.X4:12 | O-288.B2 | E | 0 |
| F12059 | LSB-BTB1: Control data transfer LSBA recognised communication breakdown in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by driver when restarting the network | A31.X4:12 | O-288.B2 | E | 0 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|---|-----------|----------|---|---|
| F1205B | LSB-BTB1: Control data transfer LSBA Short circuit on 2nd LSB-Transistor Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction Driver incorrectly configured. Check parameterization. Otherwise hardware defect. Replace module | A31.X4:12 | O-288.B2 | E | 2 |
| F12060 | LSB-BTB1: Control data transfer LSBA driver error: no order to carry out entry in error memory, driver runs on normally and waits for bus connection of participant period problems, error will be fixed by system. If incorrectly configured, new software required | A31.X4:12 | O-288.B2 | E | 2 |
| F12061 | LSB-BTB1: Control data transfer LSBA driver error: undefined message appears Entry in error stack, driver restarts and carried out new initialization of network For period problems, error will be fixed by system otherwise new software required to fix error | A31.X4:12 | O-288.B2 | E | 2 |
| F12062 | LSB-BTB1: Control data transfer LSBA Driver error: Initialization error Entry in error stack, driver restarts and carried out new initialization of network New Software necessary to remedy error | A31.X4:12 | O-288.B2 | E | 2 |
| F13050 | LSB-BTB1: LSBB Participant Adr. 0 reports an incorrect sensor type Entry in error stack, otherwise no reaction. The answer is interpreted acc. to nominal type recognition check address assignment over test system (LSB-screen), install correct sensor | A31.X4:9 | O-288.B3 | E | 2 |
| F13051 | LSB-BTB1: LSBB Participant Adr. 0 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software | A31.X4:9 | O-288.B3 | E | 2 |
| F13053 | LSB-BTB1: LSBB Participant Adr. 0 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor | A31.X4:9 | O-288.B3 | E | 1 |
| F13054 | LSB-BTB1: LSBB Participant Adr. 0 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value | A31.X4:9 | O-288.B3 | E | 2 |
| F13064 | LSB-BTB1: LSBB Participant Adr. 0 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor | A31.X4:9 | O-288.B3 | E | 1 |
| F13065 | LSB-BTB1: LSBB Participant Adr. 0 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately | A31.X4:9 | O-288.B3 | E | 2 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|--|----------|----------|---|---|
| F13066 | LSB-BTB1: LSBB Participant Adr. 0 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part | A31.X4:9 | O-288.B3 | E | 2 |
| F13067 | LSB-BTB1: LSBB Participant Adr. 0 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download | A31.X4:9 | O-288.B3 | E | 1 |
| F13068 | LSB-BTB1: LSBB Participant Adr. 0 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:9 | O-288.B3 | E | 1 |
| F13069 | LSB-BTB1: LSBB Participant Adr. 0 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system | A31.X4:9 | O-288.B3 | E | 1 |
| F1306A | LSB-BTB1: LSBB Participant Adr. 0 Expanded safety info (time stamp or CRC8) is erroneous Entry in error stack otherwise no reaction. Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode | A31.X4:9 | O-288.B3 | E | 2 |
| F1306B | LSB-BTB1: LSBB Participant Adr. 0 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode | A31.X4:9 | O-288.B3 | E | 2 |
| F1306C | LSB-BTB1: LSBB Participant Adr. 0 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor | A31.X4:9 | O-288.B3 | E | 2 |
| F13150 | LSB-BTB1: LSBB Participant Adr. 1 reports an incorrect sensor type Entry in error stack, otherwise no reaction. The answer is interpreted acc. to nominal type recognition check address assignment over test system (LSB-screen), install correct sensor | A31.X4:9 | O-288.B3 | E | 2 |
| F13151 | LSB-BTB1: LSBB Participant Adr. 1 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software | A31.X4:9 | O-288.B3 | E | 2 |
| F13153 | LSB-BTB1: LSBB Participant Adr. 1 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor | A31.X4:9 | O-288.B3 | E | 1 |

| F14E51 | LSB-BTB1: LSBB Participant Adr. 30 was not configured for the block transfer Entry in error stack, otherwise no reaction. No block transfer is made configuration problem, load new Software | A31.X4:9 | O-288.B3 | E | 2 |
| F14E53 | LSB-BTB1: LSBB Participant Adr. 30 no longer reports or withdrawn during running period Entry in error stack, participant is deactivated. Data buffers for application are set to 0 check connection, if connection OK then replace sensor | A31.X4:9 | O-288.B3 | E | 1 |
| F14E54 | LSB-BTB1: LSBB Participant Adr. 30 Features other settings (parameters) as pre-entered set values entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config check parameter set/real value through test system (LSB-screen), set sensor to default value | A31.X4:9 | O-288.B3 | E | 2 |
| F14E64 | LSB-BTB1: LSBB Participant Adr. 30 reports tolerable error in self-test Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction check sensor, clean if necessary, with repeated occurrence replace sensor | A31.X4:9 | O-288.B3 | E | 1 |
| F14E65 | LSB-BTB1: LSBB Participant Adr. 30 reports intolerable error in self-test Entry in error stack otherwise no reaction. Error free operation is no longer ensured replace sensor immediately | A31.X4:9 | O-288.B3 | E | 2 |
| F14E66 | LSB-BTB1: LSBB Participant Adr. 30 with software version, that is no longer compatible Entry in error stack otherwise no reaction. It is tried, if possible, to work with the sensor replace sensor through new part | A31.X4:9 | O-288.B3 | E | 2 |
| F14E67 | LSB-BTB1: LSBB Participant Adr. 30 supports no download function Entry in error stack, otherwise no reaction. No download is made Carry out no Download | A31.X4:9 | O-288.B3 | E | 1 |
| F14E68 | LSB-BTB1: LSBB Participant Adr. 30 may not be installed in this operating condition Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remove participant from Bus | A31.X4:9 | O-288.B3 | E | 1 |
| F14E69 | LSB-BTB1: LSBB Participant Adr. 30 two participants are active on this address Entry in error stack otherwise no reaction. Error free operation is no longer ensured Remedy address conflict by removing one participant. Assign correct addresses via test system | A31.X4:9 | O-288.B3 | E | 1 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|---|----------|----------|---|---|
| F14E6A | LSB-BTB1: LSBB Participant Adr. 30 Expanded safety info (time stamp or CRC8) is erroneous Entry in error stack otherwise no reaction. Error free operation is no longer ensured Check config. sensor parameterization. Sensor does not support this operating mode | A31.X4:9 | O-288.B3 | E | 2 |
| F14E6B | LSB-BTB1: LSBB Participant Adr. 30 May not be configured on this bus for strobe mode entry in error memory, or no reaction, the sensor data could be incorrect, due to incorrect sensor config Check config. sensor parameterization. Sensor and bus must be configured for strobe mode | A31.X4:9 | O-288.B3 | E | 2 |
| F14E6C | LSB-BTB1: LSBB Participant Adr. 30 Reports sometime still on bus Entry in error stack otherwise no reaction. Error free operation is no longer ensured check connection, if connection ok then replace sensor | A31.X4:9 | O-288.B3 | E | 2 |
| F15052 | LSB-BTB1: Control data transfer LSBB has recognised Bus collisions, communication interrupted Entry in error memory, driver moves back from bus. Reset triggered if necessary and network reinitialized with temporary malfunctions error will be eliminated from system itself, otherwise check address assignment of sensor | A31.X4:9 | O-288.B3 | E | 0 |
| F15055 | LSB-BTB1: Control data transfer LSBB Bus connection faulty/defect, short circuit to supply voltage Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board | A31.X4:9 | O-288.B3 | E | 2 |
| F15056 | LSB-BTB1: Control data transfer LSBB Bus connection faulty/defect, no supply/short circuit to earth Entry in error stack, driver tries to restart the bus. As soon as error is remedied, bus will start check bus line, sensor (withdraw) and bus circuit board for shorts, check bus fuse on bus circuit board | A31.X4:9 | O-288.B3 | E | 2 |
| F15057 | LSB-BTB1: Control data transfer LSBB has recognised network re-set (data transfer starts again) Entry in error stack, driver restarts and carried out new initialization of network Check bus line, pull successive sensors from bus until source of problem is found. Replace defective part | A31.X4:9 | O-288.B3 | E | 1 |
| F15058 | LSB-BTB1: Control data transfer LSBB recognised participant with incorrect baud rate in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by system. Check address assignment of sensors | A31.X4:9 | O-288.B3 | E | 0 |
| F15059 | LSB-BTB1: Control data transfer LSBB recognised communication breakdown in bus Entry in error stack, driver restarts and carried out new initialization of network Will be remedied by driver when restarting the network | A31.X4:9 | O-288.B3 | E | 0 |
| F1505B | LSB-BTB1: Control data transfer LSBB Short circuit on 2nd LSB-Transistor Entry in error stack otherwise no reaction. Only note, the sensor still functions without restriction Driver incorrectly configured. Check parameterization. Otherwise hardware defect. Replace module | A31.X4:9 | O-288.B3 | E | 2 |

| Fehler-Nr. | Fehlertext / Reaktion / Behebung | Stecker | Blatt | K | W |
|------------|--|----------|----------|---|---|
| F15060 | LSB-BTB1: Control data transfer LSBB driver error: no order to carry out entry in error memory, driver runs on normally and waits for bus connection of participant period problems, error will be fixed by system. If incorrectly configured, new software required | A31.X4:9 | O-288.B3 | E | 2 |
| F15061 | LSB-BTB1: Control data transfer LSBB driver error: undefined message appears Entry in error stack, driver restarts and carried out new initialization of network For period problems, error will be fixed by system otherwise new software required to fix error | A31.X4:9 | O-288.B3 | E | 2 |
| F15062 | LSB-BTB1: Control data transfer LSBB Driver error: Initialization error Entry in error stack, driver restarts and carried out new initialization of network New Software necessary to remedy error | A31.X4:9 | O-288.B3 | E | 2 |
| F15D51 | LSB-BTB1: control auxiliary equipment Button Ladder UP after Start/op. error actuated or stuck Movement is not actuated check wiring | A31 | | E | |
